- You can use any font for the name. "Ethan" is 137 sts x 48 rows. See directions on page 3 .
- When picking up stitches for the side borders, you will need to pick up 5 sts every inch. Since my row gauge was 7 rows per inch, I picked up 5 sts in every 7 rows. You will need to adjust this if your row gauge is different.

## Graphing a name:

Using your favorite word processor and your preferred font, enter the name you are going to use. Set the page to landscape and enlarge the font so that it fills the page horizontally. Using a clipping program, clip the image and save as .jpg. Now you can bring in the image to a graphing program to chart the name.

If you do not have a graphing program, make the letters the size you want. The name may span multiple pages. Print out the name; put a sheet or sheets of graph paper over the name and chart it.
